This workshop will be shaped by what you bring to it and will build on what was learned at the Website Development I workshop held this past March. Website Development I covered basic web layouts in XHTML and CSS, moving files to a web server (FTP), customizing images and working with color on your pages.

Participants registering for this workshop should be actively working on designing a web site.

Bring your web development project, in whatever stage it's in, and we will work with you one-on-one on solving problems that you've encountered. When you register, please indicate the type of problems or questions you would like us to address concerning your web site project. Also with your registration, if your project is online, please include a link; if not online, please send (email) your main HTML and CSS files.

The presenters for this workshop are from the Capital Area Community Media Center (CMC), an emerging regional non-profit multimedia center promoting our community. The CMC has contracted with the *Power of We Consortium* to build the communication and media capacity of faith-based and community organizations in the Lansing area.

The workshop location is in an MSU Computer Lab where the amount of equipment in the lab causes the room temperature to constantly adjust to keep computers from overheating, so participants may want to dress in layers for comfort.

Advance registration is requested

- Send a separate registration for each participant, by email, to Wendy Duke-Littlejohn at wduke@ingham.org
- **Registrations must include:**
 - ❖ Name, Title/Position, Organization, Daytime Phone Number, Individual E-mail Address and Workshop Title
 - ❖ **Specific questions and/or problems about your web site project you'd like addressed during the workshop**
 - ❖ **If your project is online, please provide the link; if not online please send (email) your main HTML and CSS files**
- Free parking is available in Ramp #2 and Faculty/Staff Lot 10 (see map on web for parking and building locations)
